The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership and many other personal finance topics.

Vietnam opened its doors to tourists in the late 80s and, while at first a destination frequented by backpackers and war veterans, its appeal has grown ever since. Blessed with a long coast sprinkled with casuarina-lined beaches, the country now attracts sun-lovers and surfers, with resorts and spas sprouting all along the coast. Part of the award-winning Eyewitness series, this sumptuously illustrated guide leads readers to it all, from the floating markets of the Mekong Delta in the south to the hill towns inhabited by the Hmong minority in the north, and the best beaches to be found in between. A full chapter is dedicated to Angkor in neighboring Cambodia, with the astounding temples illustrated in glorious detail. Whether zipping around old Hanoi in a pedal-powered cyclo or dining on the exquisite local cuisine, the Eyewitness Guide to Vietnam and Angkor Wat is indispensable.

With increased competition for external funding, technological advancement, and public expectations for transparency, not-for-profit and non-governmental organizations are facing new challenges and pressures. While research has explored the roles of accounting, accountability, and performance management in nonprofit organizations, we still lack evidence on the best practices these organizations implement in the areas of accountability and performance management. This book collects and presents that evidence for the first time, offering insights to help nonprofits face these new challenges head-on. Performance Management in Nonprofit Organizations focuses on both conventional and contemporary issues facing nonprofits, presenting evidence-based insights from leading scholars in the field. Chapters examine the design, implementation, and working of accounting, accountability, governance, and performance management measures, providing both retrospective and contemporary views, as well as critical commentaries on accounting and performance related issues in nonprofit organizations. The book's contributors also offer critical commentaries on the changing role of accounting and performance management in this sector. This research-based collection is an interesting and useful read for academics, practitioners, students, and consultants in nonprofit organizations, and is highly accessible to accounting and non-accounting audiences alike.

This book constitutes the refereed proceedings of the 9th Pacific Rim International Workshop on Multi-Agents, PRIMA 2006, held in Guilin, China, in August 2006. The book presents 39 revised full papers and 57 revised short papers together with 4 invited talks, addressing subjects from theoretical and methodological issues to applications. Topics include agent models, agent architectures, agent-oriented software engineering, semantic Web service, collaboration, coordination and negotiation, and more.

The Rough Guide to Canada (Travel Guide eBook)

Want to make DOUBLE-DIGIT returns in a completely unsaturated market even if you're broke? Then you need to keep reading... When first I started my real estate journey, I wasted my life savings on a Guru who just gave me the same tired advice he gave all his students: Drive for dollars... Mailers... Cold Call... For 6 months, 40 hours a week I did everything this supposedly experienced investor said. But even that wasn't enough because I never even came close to closing a deal! Oh sure, I could find deals... but as soon as I bid on them, I'd discover that 50 of my peers had beat me to it! How was I supposed to compete? I had just spent my last dollar on bad advice, I had a day job, and I had no experience! After 6 grueling months of failure, I was more than ready to throw in the towel. Maybe real estate just wasn't for me. Maybe I could find some other way to reach financial independence... Lucky for me, my wife wasn't ready to give up. She managed to talk me into going to one last club meeting. Who knows? She said. Some inspiration might hit you! So, there I was, in that familiar, dimly lit hotel conference room, surrounded by the hopeful faces of new investors at their first or second meeting. Wait a second... I don't recognize any of these people! That's when it hit me... all these new people make this market way too saturated. So I set out to find one that wasn't. In this book you will discover: 3 reasons why flipping land is 10x better than flipping houses! (despite what HGTV would have you believe) How to start land investing with an EXTREME BUDGET and ZERO KNOWLEDGE! Where to find undervalued deals other investors are overlooking! The simple formula to determine if a property is a deal or a dud! The Most Common Pitfalls and how you can avoid them! Where you can find unlimited help! (hint: It's not a guru and it's FREE) 5 Reasons why Land Investing Is THE MOST beginner-friendly investment! And so much more... If you read this book, you will discover how to complete your first deal in 60 days. Even if you have never invested before and you have no money, this book gives you the step by step process you need to be successful. So if you're a broke beginner who wants to make double-digit ROIs then scroll up and click the "Add to Cart" button now.

Madrid has gone from shanty town to imperial capital in the last seven centuries. The local writers of Time Out Madrid assist travelers in seeing the city as a native, suggesting where to stay, eat, shop and experience its cultural offerings. Famed for its wild nights and lazy days, Madrid provides a whole lot more, from spectacular opera productions, chirpy folkloric zarzuela, and cutting-edge cuisine to ancient, tiled tabernas, designer-shoe shopping, and numerous flea markets. Written by resident journalists, Time Out Madrid also covers the artistic jewels housed in the Prado, Thyssen, and Reina Sofia, as well as the etiquette of watching a bullfight or joining in with a flamenco performance, as well as where to stay and how to escape the city heat. Also included are the intriguing stories behind some of the city's best-known paintings, where to find gourmet tapas, the yoga centers, spas, and Turkish baths. Climbing, skiing, and hang-gliding are all within reach of the city, and suggested trips out of town are also recommended.

During a time of accelerating momentum for radical change in the study of economics, 'A Guide to What's Wrong with Economics' comprehensively re-examines the shortcomings of neoclassical economics and considers a number of alternative formulations.

Learn how to use natural no-till systems to increase profitability, efficiency, carbon sequestration, and soil health on your small farm. The Organic No-Till Farming Revolution is the comprehensive farmer-developed roadmap showing how no-till lowers barriers to starting a small farm, reduces greenhouse gas emissions, increases efficiency and profitability, and promotes soil health. Farming without tilling has long been a goal of agriculture, yet tilling remains one of the most dominant paradigms; almost everyone does it. But tilling kills beneficial soil life, burns up organic matter, and releases carbon dioxide. If the ground could instead be prepared for planting without tilling, time and energy could be saved, soil organic matter increased, carbon sequestered, and dependence on machinery reduced. This hands-on manual offers: Why roller-crimper no-till methods don't work for most small farms A decision-making framework for the four no-till methods: occultation, solarization, organic mulches grown in place, and applied to beds Ideas for starting a no-till farm or transitioning a working farm A list of tools, supplies, and sources. This is the only manual of its kind, specifically written for natural and small-scale farmers who wish to expand or explore chemical-free, regenerative farming methods.
