In the wake of the global financial crisis, water services have come under renewed neoliberal assault across Europe. At the same time, the struggle against water privatization has continued to pick up pace; from the re-municipalization of water in Grenoble in 2000, to the United Nations declaration of water as a human right in 2010. Fighting for Water, Andreas Bieler draws on years of extensive fieldwork to dissect the underlying dynamics of the struggle for public water in Europe. By analysing the successful referendum against water privatization in Italy, the European Citizens' Initiative on 'Water and Sanitation are a Human Right', the struggles against water privatization in Greece and water charges in Ireland, Bieler shows why water has been a fruitful arena for resistance against neoliberal restructuring. Non-state actors fully understand that attacking the much more powerful state requires moving the conflict away from the traditional battlefield where they are at an enormous disadvantage. Dietary supplements made from foods, herbs and their constituents are a rapidly growing market sector. Consumers often view food supplements as 'natural' and therefore safe; however, supplements are regulated as foods rather than as pharmaceuticals and so are not as closely monitored as may be necessary. With the commercial market in these products growing, this book provides essential research into their safety, efficacy and potential risk of interaction with pharmaceuticals. Following an introductory chapter, part one covers the chemical composition, manufacture and regulation of

dietary supplements. Part two looks at the effectiveness of different types of dietary supplement and methods of evaluation. Finally, part three focuses on supplement safety. Reviews the design, production and regulation of dietary supplements. Analyses the potential for pharmacokinetic and pharmacodynamics interactions between dietary supplements and pharmaceuticals. Offers reviews of important clinical studies on the efficacy of dietary supplements for range of conditions.

Airline Operations and Management: A Management Textbook is a survey of the airline industry, mostly from a

managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly economics, operations, marketing and finance, in developing the overview of the industry. The focus is on tactical, rather than strategic, management that is specialized or unique to the airline industry. The primary audiences for this textbook are both senior and graduate students of airline management, but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry beyond their own functional area. Cybercrime affects over 1 million

people worldwide a day, and cyber attacks on public institutions and businesses are increasing. This book interrogates the European Union's evolving cybersecurity policies and strategy and argues that while progress is being made, much remains to be done to ensure a secure and resilient cyberspace in the future.

The intersections of law and contemporary culture are vital for comprehending the meaning and significance of law in today's world. Far from being unsophisticated mass entertainment, comics and graphic fiction both imbue our contemporary culture, and are themselves imbued, with the concerns of law and justice.

Accordingly, and spanning a wide variety of approaches and topics from an international array of contributors, *Graphic Justice* draws comics and graphic fiction into the range of critical resources available to the academic study of law. The first book to do this, *Graphic Justice* broadens our understanding of law and justice as part of our human world—a world that is inhabited not simply by legal concepts and institutions alone, but also by narratives, stories, fantasies, images, and other cultural articulations of human meaning. Engaging with key legal issues (including copyright, education, legal ethics, biomedical regulation, and legal personhood) and exploring

critical issues in criminal justice and perspectives on international rights, law and justice—all through engagement with comics and graphic fiction—the collection showcases the vast breadth of potential that the medium holds. *Graphic Justice* will be of interest to academics and postgraduate students in: cultural legal studies; law and the image; law, narrative and literature; law and popular culture; cultural criminology; as well as cultural and comics studies more generally.

A number of changes have been made to the supervision and regulation of banks as a result of the recent financial meltdown.

Some are for the better, such as the Basel III rules for increasing the quality and quantity of capital in banks, but legal changes on both sides of the Atlantic now make it much more difficult to resolve failing banks by means of taxpayer funded bail-outs and could hinder bank resolution in future financial crises. In this

Geography Grade 11

book, Johan A. Lybeck uses case studies from Europe and the United States to examine and grade a number of bank resolutions in the last financial crisis and establish which were successful, which failed, and why. Using in-depth analysis of recent legislation, he explains how a bank resolution can be successful, and emphasizes the need for taxpayer-funded bail-outs to create a viable banking system that will promote economic and financial stability. Differing interpretations of the history of the United Nations on the one hand conceive of it as an instrument to promote colonial

interests while on the other emphasize its influence in facilitating self-determination for dependent territories. The authors in this book explore this dynamic in order to expand our understanding of both the achievements and the limits of international support for the independence of colonized peoples. This book will prove foundational for scholars and students of modern history, international history, and postcolonial history.

Adopting a constructivist approach, this book argues that China's prospects for achieving 'great power' status peacefully

**This book studies the reactions by external actors, including the European Union, to the events unfolding in the Arab world beginning in December 2010. In particular, contributors look at external actors' attempts to balance their desire for stability with their normative principles toward human rights and democracy. The book compares the action (and inaction) of the EU with other international and regional players, including the United States, Russia, Turkey**

and Israel, and assesses the response of these actors to the Arabellions' events, analysing changes in their approaches to the Arab region. The

contributions to this book

answer three questions: (1) How have external actors assessed the 'Arabellions' and what role did they see for themselves in this context? (2) Which goals and instruments did external actors pursue toward the MENA region? In particular, how did they deal with conflicting goals, such as support for human rights and democracy, on the one hand, and concerns about security and stability, on the other? (3) How can we explain

**Arabellions? This book was published as a special issue of the Journal of European Integration.**

**This book examines the contribution of the European Commission to the process of transformation of EU borders. Migration issues have been at the centre of EU political debates in recent years. From national controversies sparked by the economic difficulties in the aftermath of the 2008 economic downturn to EU-wide problems caused by the record number of asylum seekers looking for a refuge in the Union.**

**Simultaneously, the EU migration regime has undergone a profound change since the 1980s as a result of the developments in the integration process. Inevitably this has impacted borders, transforming their nature and functions. The author looks at four key EU policy areas, which in recent decades have substantially altered the EU migration regime: the European Neighbourhood Policy, social policy, border controls, and free movement of people. Based on a variety of Commission documents the analysis focuses on the different borders that have been transformed, their altered nature**

**and functions, and the specific impact of the European Commission on to these processes.**

**As a consequence of being sued by more than 20 foreign investors, India terminated close to 60 investment treaties and adopted a new Model Bilateral Investment Treaty (BIT) purportedly to balance investment protection with the host State's right to regulate. This book is a critical study of India's approach towards BITs and traces their origin, evolution, and the current state of play. It does so by locating them in India's economic policy in general and policy towards**

**foreign investment in particular. India's approach towards BITs and policy towards foreign investment were consistent with each other in the periods of economic nationalism (1947–1990) and economic liberalism (1991–2010). However, post 2010, India's approach to BITs has become protectionist while India's foreign investment policy continues to be liberal. To balance investment protection with the State's right to regulate, India needs to evolve its BIT practice based on the twin framework of international rule of law and embedded liberalism. As the world's most dynamic region, Asia embodies explosive economic growth, diverse political systems, vibrant societies, modernizing militaries, cutting-edge technologies, rich cultural traditions amid globalization, and strategic competition among major powers. As a result, international relations in Asia are evolving rapidly. In this fully

updated and expanded volume, leading scholars from Asia, Europe, and North America offer the most current and definitive analysis available of Asia's regional relationships. They set developments in Asia in theoretical context, assess the role of leading external and regional powers, and consider the importance of subregional actors and linkages. Combining interpretive richness and factual depth, their essays provide an authoritative and stimulating overview. In this timely and fascinating account of US military power in the era of Barack Obama, a renowned historian with more than a decade inside the US Department of Defense reveals the true nature of the president ' s political legacy as his two terms in office draw to a close. In stunning detail, Mark Moyar illustrates how the mounting global catastrophes of

Obama ' s second term are the direct result of the president ' s first-term decisions to shrink US defense and replace large overseas military commitments with “ light footprints. ” The rise of ISIS. The Benghazi attack and murder of a US ambassador. The growing threats of Russia, China, and Iran—Moyar reveals how these and other tragic occurrences are the consequences of Obama ' s:

- Withdrawal of US military in Iraq
- Rapid drawdown in Afghanistan
- Hands-off policy with Syria
- Cuts to defense spending
- Reliance on drone strikes in Pakistan, Yemen, and Somalia
- Failure to deliver on his substitutes for military power
- Political self-interest
- International image as a weak and passive leader

Most disturbing, according to Moyar ' s penetrating

analysis, is the clear message that Obama's military drawdown places all Americans at risk, with conditions primed for future cataclysms at home and abroad. Drawing upon the lessons of Obama's strategic failures, Moyar identifies methods for recovering and strengthening US national security in the years—and the administrations—to come.

This volume offers a critical analysis and illustration of the challenges and promises of 'stateless' law thought, pedagogy and approaches to governance - that is, understanding and conceptualizing law in a post-national condition. From common, civil and international law perspectives, the collection focuses on the definition and role of law as an academic discipline, and hybridity in the practice and production of law.

With contributions by a diverse and international group of scholars, the collection includes fourteen chapters written in English and three in French. Confronting the 'transnational challenge' posed to the traditional theoretical and institutional structures that underlie the teaching and study of law in the university, the seventeen authors of *Stateless Law: Evolving Boundaries of a Discipline* bring new insight to the ongoing and crucial conversation about the future shape of legal scholarship, education and practice that is emblematic of the early twenty-first century. This collection is essential reading for academics, institutions and others involved in determining the future roles, responsibilities and education of jurists, as well as for academics interested in Law, Sociology, Political

analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists, including US citizens (Publishers Weekly, starred review). In the long response to 9/11, the US government initiated a deeply controversial policy of “ targeted killing ” —the extrajudicial execution of suspected terrorists and militants, typically via drones. A remarkable effort was made to legitimize this practice; one that most human rights experts agree is illegal and that the United States has historically condemned. In The Drone Memos, civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action. In a

lucid and provocative introduction, Jaffer, who led the ACLU legal team that secured the release of many of the documents, evaluates the drone memos in light of domestic and international law. He connects the documents' legal abstractions to the real-world violence they allow, and makes the case that we are trading core principles of democracy and human rights for the illusion of security. "A careful study of a secretive counterterrorism infrastructure capable of sustaining endless, orderless war, this book is profoundly necessary." —Katrina vanden Heuvel, editor and publisher of *The Nation*

Consistently praised for its engaging writing style, currency, and visual appeal, *MEDIA/IMPACT* focuses students on today's digital mass

media industries and support businesses as well as the legal, ethical, social, global, and technological issues that these businesses face every day. The totally re-designed eleventh edition gives special emphasis to convergence--how the mass media industries are intersecting to deliver content and how audiences are adapting to the new mass media marketplace. The author grounds her discussion in the business aspects of all the mass media industries, with concise histories of each industry plus an insider's look at what it's like to work in each business. This book provides a history of emergency planning with respect to nuclear power plant accidents from the 1950's to the 2000's. It gives an overview of essential concepts that a working emergency planner should know, including brief overviews of the health physics and plant engineering that applies to emergency planning. Each chapter covers topics unique to radiological planning that distinguish it from planning for natural disasters. Some of the topics include processes that damage fuel, reactor source terms, basic dispersion

theory, protective measures for the public and emergency worker, environmental surveys, and the essential elements of a drill and exercise program. Emergency Planning for Nuclear Power Plants is not intended as a guide to meeting regulatory requirements but provides an understanding of the essential concepts and language of radiological planning, so the planner can apply those concepts to their particular situation.

but that they have decided to keep the public from seeing. The reason for the "missing" files is to stop the truth about some of the world's greatest conspiracies from ever becoming known, such as the Roswell UFO crash, the JFK assassination, Project MKUltra (the CIA's mind control operation), and a secret U.S. base on the moon.

As well as taking stock of the current and proposed legal instruments, the book looks at the wider policy and economic aspects of coping with climate change. It provides a comparative overview of key issues across Europe, the United States, Asia-Pacific
